Allowable Subject Matter

3. Claims 1-24, 26-57, 59-90 and 92-111 are allowed. The following is an examiner's statement of reasons for allowance.

Independent claims 1, 34 and 67 are directed to "automatically identifying and designating a state associated with the insurance insolvency; associating with at least one of the state funds the corresponding insurance account with the corresponding relationship to at least one of the states associated with the insurance insolvency in the computer system; associating with the insurance account the at least one line of insurance; identifying in the computer system at least one of a state statute, regulation and rule relating to the at least one line insurance associated with the insurance account; and adjusting in the computer system an amount associated with the corresponding insurance account with the corresponding relationship to at least one of the states associated with the insurance insolvency in accordance with the transaction based on the identified at least one of a state statute, regulation and the rule and the at least one line of insurance associated with the insurance account".

The closest prior art of record, King et al. (5,704,045) discloses system and method of risk transfer and risk diversification including means to assure with assurance of timely payment and segregation of the interests of capital.

Walker et al.(6,119,093) discloses system for syndication of insurance.

Kern (6,604,080) discloses computer system and methods for supporting workers' compensation/employers liability insurance.

Aquila et al. (2002/0035488) discloses system and method of administering, tracking and managing of claims processing.

However, none of the cited prior art fairly teaches/suggests “automatically identifying and designating a state associated with the insurance insolvency; associating with at least one of the state funds the corresponding insurance account with the corresponding relationship to at least one of the states associated with the insurance insolvency in the computer system; associating with the insurance account the at least one line of insurance; identifying in the computer system at least one of a state statute, regulation and rule relating to the at least one line insurance associated with the insurance account; and adjusting in the computer system an amount associated with the corresponding insurance account with the corresponding relationship to at least one of the states associated with the insurance insolvency in accordance with the transaction based on the identified at least one of a state statute, regulation and the rule and the at least one line of insurance associated with the insurance account”, as recited in claims 1, 34 and 67 above.

Claims 2-24, 26-36, 35-57, 59-66, 68-90 and 92-111 incorporate the features of claims 1, 34 and 91 through their dependencies, and are also allowed for the same reasons given above.

4. The drawings filed on 12/20/00 have been approved by the Examiner.
5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
